FRANK GEHRY 1930-PRESENT :: Gehry has become the celebrity architect of the 21st Century and approaches "each building as a sculptural object, a spatial container, a space with light and air, a response to context and appropriateness of feeling and spirit." Gehry takes this point of view along with his ideal of architecture as art to create his renowned free flowing structures. This approach to design translates to his influential furniture design utilizing "easy edges" and "experimental edges," which is realized in the Wiggle chair.
